The diagram illustrates a license distribution system architecture. It includes a Client Terminal 300, a Storefront Server 200 (SF), a License Distribution Management Server 100 (LDMS), and a Product Information Registration System 501. The Client Terminal 300 is connected to the Storefront Server 200 and the License Distribution Management Server 100. The Storefront Server 200 contains a Product List Transmitting Means 203, a Purchase Certificate Providing Means 201, a Purchase Certificate ID Database 210, and an Account Settling Means 202. The License Distribution Management Server 100 contains a Purchase Certificate Generating Means 101, a License Generating Means 102, a License Granting Means 103, a Product Information Database 110, and a Purchase Certificate Database 120. The Product Information Registration System 501 is connected to the License Distribution Management Server 100. A License Reissue Means 600 is also shown, connected to the License Granting Means 103 and the License Distribution Management Server 100. Arrows indicate the flow of data and control between these components.
